

Palaeontographica Abteilung B – Instructions for Authors

ISSN 0375-0299

March, 2011

Palaeontographica Abteilung B is indexed in: Science Citation Index-Expanded (SCIE), including the Web of Science Research Alert – Current Contents/Physical, Chemical and Earth Sciences (CC/PC&ES).

Section B of Palaeontographica publishes qualified contributions of paleobotanical and stratigraphical interest. Papers should not exceed 80 printed pages in Palaeontographica format (17.5 by 23 cm; 6.91" by 9.09").

Editors in chief:

Dr. KURT GOTH, Dresden, Germany

Prof. Dr. DIETER HANS MAI, Berlin, Germany

Manuscript submission: Original manuscripts and illustrations (accompanied by at least one additional copy) are to be sent to Dr. LUTZ KUNZMANN, Senckenberg Naturhistorische Sammlungen Dresden / Senckenberg Natural History Collections Dresden, Königsbrücker Landstraße 159, 01109 Dresden, Germany.

email: palb@senckenberg.de

Dr. RONNY RÖßLER, Museum für Naturkunde, Moritzstr. 20, 09111 Chemnitz, Germany.

email: palb@naturkunde-chemnitz.de

with the following **exceptions:**

Submit manuscripts on **dinoflagellates and acritarchs** to:

Prof. Dr. RAIMOND BELOW, Geologisches Institut der Universität Köln, Zülpicher Str. 49A, 50674 Köln, Germany.

e-mail: adh04@uni-koeln.de

manuscripts on **spores and pollen** to:

Dr. BARBARA MOHR, Humboldt-Universität zu Berlin, Museum für Naturkunde, 10099 Berlin, Germany.

email: barbara.mohr@museum.hu-berlin.de

Manuscripts from the **US, Canada and Great Britain:**

Macropaleobotany - Cenozoic:

Dr. MARGARET E. COLLINSON, Dept. of Geology, Royal Holloway and Bedford New College, Univ. of London, Egham Hill, Egham, Surrey TW20 0EX, Great Britain. email: m.collinson@gl.rhul.ac.uk

Macropaleobotany - Mesozoic:

Prof. Dr. SIDNEY ASH, Dept. of Earth and Planetary Sciences, Univ. of New Mexico, Albuquerque NM 87131-1116, USA.

Macropaleobotany - Paleozoic:

Prof. Dr. DIANNE EDWARDS, Dept of Geology, Univ. of Wales, College of Cardiff, POB 914, Cardiff CF1 3YE, Wales, Great Britain.

email: edwardsd2@cardiff.ac.uk

Manuscripts submitted from the **Australia and New Zealand:**

Prof. Dr. G. PLAYFORD, Dept. of Earth Sciences, Univ. of Queensland, St. Lucia Campus, Brisbane, Australia 4072.

email: g.playford@uq.edu.au

French language manuscripts should be submitted to:

Prof. Dr. J. GALTIER, UMR, Botanique et Bioinformatique, CIRAD, TA40/PS2 Boulevard de la Lironde, 34398 Montpellier Cedex 05, France. email: jean.galtier@cirad.fr

For technical reasons, printing of papers in order of receipt cannot be guaranteed.

Authors are solely responsible for the scientific content of their papers.

Submission of a manuscript to the editor for publication in Palaeontographica Section B is considered **binding assurance from the author that this work has not and will not be published elsewhere in this form and length**. With acceptance and publication of a manuscript the exclusive copyright for every language and country is transferred to the publishers. The copyright covers the exclusive rights to reproduce and distribute the article including reprints, microfilm or any other reproductions and translations.

Word-processor generated manuscripts

Manuscripts must be submitted ready for printing. Your manuscript on CD, prepared preferably using Microsoft Word for Windows, should be sent to the editor accompanied by one printout of your manuscript. The data file should correspond completely to the submitted printout of your manuscript. Please indicate the name of the file and the word processing system used (e.g. Word 2003). In your manuscript use only the following mark-up of types: normal, bold, small capitals and italics (please use italics only for genera and species; not for names of higher taxa; not for names with Latin suffixes; not for additions like "cf.", "aff.", "sp." and "n. sp."; not for accentuation of words within the text). Avoid manual hyphenation of words. Do not use style sheets or templates. Combine your figure captions and tables at the end of the data file. These legends and explanations should additionally be in English, if the article itself is not written in English.

Footnotes are to be consecutively numbered and entered at the bottom of the page where they appear under a horizontal line.

Use of footnotes should be kept to a minimum.

References must include the author's name and year of publication of each paper.

Any **abbreviations** used must be uniform and consistent.

Structure of the paper

- Title page should contain:
 - Title of the paper (as short and precise as possible; subtitles and words in parentheses are to be avoided)
 - English translation of the title (if the article is not written in English)
 - First and last names of the author(s), location where the work was done (i.e. Alexander Brown, Baltimore).
- English summary
- Key words: Up to 5 key words should appear at the end of the "Summary", respectively. These should facilitate correct classification in subject areas for data processing (e. g. Key words: conodonts, ultrastructure, biogenic calcium phosphate, Jurassic, India)
- Table of contents (The sections and subtitles of the table of contents must correspond to the structure of the main text)
- Introduction
The introduction should contain:
 - General description of the problem
 - Discussion of previous work on the same subject (by other authors)
 - Explanations of special features and abbreviations in the text
- Methodology and techniques used in the investigations
- Text
- Acknowledgements or recognition of research assistance
- References
- Explanation of plates

Description of species: Observe the International Rules of Botanical Nomenclature when presenting new species.

In open nomenclature abbreviations cf., aff., n. sp., n. gen. et sp. are to be used without further additions. Analogously: subsp., subgen.

In the synonymy list, separate species names and literature references by a dash in cases where the describer is not the original describer of the species. Examples:

1855 *Populus balsamoides* GOEPPERT, Tertiary Flora of Schossnitz, Silesia, p. 23, tab. 15, figs 5, 7.

1856 *Populus glandulifera* – HEER, Flora tertiaria Helvetia II, p. 17, figs 5–8, tab. 68, fig. 7.

Referring to types and typoids indicate the location of collection (abbreviated) and catalogue number of the fossil.

Illustrations: Illustrations in the text are to be labelled as "Text-fig." (those on the plates as "Fig."). For figures on plates, please specify the plate number. Diagrams printed on laser or ink-jet printers are acceptable, photocopies and dot-matrix printouts are not. Labelling must be large enough to allow necessary reductions in size (characters must have a final size of at least 2 mm (after reduction)). Photographic prints must be high-gloss and sharp, with clear contours and lighting of the object from the left front. Indicate the scale for all figures in the explanatory text and use a scale bar whenever possible.

Please mark in the printout of the text the approximate place where the text-figures should be located.

Photo plates: Photo plates should be mounted on stiff cardboard with plain white or black background. Photo reproductions of whole plates cannot be accepted. The individual figures on a plate should correspond in terms of dark/light contrast so that the whole table appears as a unit. Indicate the desired degree of reduction on the reverse side of each illustration.

If an inscription cannot be clearly and neatly placed on a plate, please put it in pencil; the publishers will then have it drafted and inserted.

The type area for plates is 17.5 x 23 cm and should not be exceeded.

Only a limited number of photo plates (max. 15) can be accepted for each paper without printing charges. The appropriate number of plates will be fixed by the editors.

Electronic version of illustrations and plates: Files of illustrations and plates can be delivered on CD-ROM. Line-art figures must be supplied in tif- or eps-format (no Corel Draw) at a resolution of at least 600 dpi. Photographs must be provided at a minimum resolution of 300 dpi (tif, eps or jpg). Please be sure that in eps-files all fonts are embedded. The digital version has to be accompanied by a high-quality printout.

Literature references: We request that the Germans standard (DIN 1502) for journal name abbreviations be used. For example: FLÜGEL, E. & HÖTZL, H. (1966): Hydrozoen aus dem Ober-Jura der Hesperischen Ketten (Ost-Spanien). – N. Jb. Geol. Paläont., Abh., **124**: 103-117.

LINDEMANN, R. & YOCHELSON, E. L. (1994): Redescription of *Styliolina* (Incertae Sedis) – *Styliolina fissurella* (HALL) and the type species *S. nucleata* (KARPINSKY). – In: LANDING, E. (ed.): Studies in Stratigraphy and paleontology in honor of D. W. FISHER. – New York State Museum, Bull., **481**: 149-160.

SCHINDEWOLF, O. H. (1950): Grundfragen der Paläontologie. – 1. Aufl., (Schweizerbart Verlag) Stuttgart.

TAYLOR, T. N. (1981): Paleobotany: An introduction to fossil plant biology. – 589 pp. (McGraw-Hill Book Co.) New York.

All publications referred to in the text of the paper must be included in the reference list.

Proofs: The authors (the first-named author for co-author papers) will receive by email a pdf file of page proofs prior to printing. We request that the corrections of the proofs will be returned to the publishers immediately. If the corrections are not returned within the period indicated in the email, the paper will be published exactly as it appears on the uncorrected page proofs. Author's corrections in proof must not exceed 10% of the typesetting costs; above that, the authors will be charged.

Reprints: 35 reprints of each article will be supplied free of charge; additional copies may be ordered at cost price.
