

Instructions to Authors – Publication information

River Systems is an international journal that integrates landscape, catchment and human perspectives into a holistic view of river systems. It is dedicated to promoting innovative basic research results and their application in management and conservation. Interdisciplinary research on rivers from the catchment and landscape perspectives is particularly welcome. "River Systems" thus bridges the gap between inter- and transdisciplinary research and highlights management applications and science implementation at multiple temporal and spatial scales. An innovation of "River Systems" will be the inclusion of relevant science education cooperations. The language of the journal is English. The journal "River Systems" is a relaunch of the "Large Rivers, Supplement to Archiv für Hydrobiologie", published since 1993.

Standard papers: Should be as concise as possible, less than 15 printed pages. Longer manuscripts will be accepted for publication in *exceptional* cases only. Shorter submissions take precedence when space is limited.

Notes: These should be structured like standard papers and contain short original contributions presenting new methods or other results of general interest.

Comments: Very short papers (max. 2 pages) containing opinions, contributions to current scientific debate or responses to published articles.

Invited reviews: Articles summarizing the state of the art of particular topics of general interest. Authors planning a review article must contact the editors before preparing the manuscript. The manuscripts are subject to peer review.

Manuscripts shall be submitted through the Schweizerbart Electronic Manuscript Management System. Please visit www.schweizerbart.de and follow the links to River Systems; direct link: <https://www.schweizerbart.de/submit/riversystems>. Please follow the authors instructions accessible through the online MMS. Please add 4 - 6 keywords to your submission.

Manuscripts must be submitted ready for printing; i.e. produced by a word processing system (preferably Word for Windows). To avoid confusion with spacing, right-hand justification should be switched off. Do not use style sheets or templates. Manuscripts must be written in English. Following the author's name please indicate the institution where your contribution was produced. The full address of the institution should be quoted at the end of the title page as a footnote. A short English abstract without paragraphs has to be given on the first page of the work, following the English title. An English summary may be given before the references at the end of more comprehensive works. The references should include references to the relating pages respectively tables or figures which contain the supporting material for the results attained. **All manuscripts are subject to peer review.**

Submission of a manuscript to one of the editors for publication in River Systems is considered binding assurance that this work has not been submitted for publication elsewhere in this form and length.

Copyright: With acceptance and publication of a manuscript the exclusive copyright for every language and country is transferred to the publishers. The copyright covers the exclusive rights both to reproduce and distribute the article including reprints, electronic versions, microfilm or any other reproduction and the rights to distribute as electronic file and for saving in data processing systems.

Proofreading: The first authors will receive a pdf-file. In order to speed publication, we request that the corrected proofs are checked and returned to the publishers immediately. In cases where the author is prevented from making corrections, he should appoint a representative to check the proofs. If the proofs are not returned in time, the paper will be published exactly as it appears in the uncorrected proofs.

Only corrections of typesetting errors are accepted. All other changes to manuscript can only be made at the expense of the author.

Accentuation Typefaces: Word-processor generated manuscripts should only use **boldface** and *italics*. Please do not use capitals for titles and headlines.

Units: Use the International System of Units (SI). When one unit appears in the denominator, use the solidus e.g., mg/m³; use negative exponents (e.g., mg l⁻¹ h⁻¹) for two or more units in a denominator.

Illustrations: For the print of colour figures please contact the publisher for a quote. Digital halftone figures should have a resolution of at least 300 dpi (.tif, .eps, .jpeg), digital line drawings (only .tif or .eps!) should have a resolution of at least 600 dpi, preferably 1200 dpi.

Literature References: When abbreviating journal titles, we request that the author uses the Serials Source List for the Biological Sciences, used by Biological Abstracts/BIOSIS, see http://www.csa.com/ids70/serials_source_list.php?db=aquclust-set-c

Thus, references should appear as follows:

Cumchal, M.M. & Drenner, R.W. (2004): Interrelationship between phosphorus loading and common carp in the regulation of phytoplankton. – Arch. Hydrobiol. **161**: 147–158.

Dumont, H.J. & Negrea, S. (1996): Introduction of the class Branchiopoda. – In: Dumont, H.J. (ed.): Guides to the Identification of the Continental Waters of the World 19. – Backhuys, Leiden, pp. 1–398.

Reprints: A pdf-file for personal use free of charge will be supplied of each published paper; additional printed reprints may be ordered at cost.

Fast Track publication (pre-print-publication): For rapid publication of your scientific results, the uncorrected proof will be published online as 'fast-track' paper on the Ingenta website of the journal, at <http://www.ingentaconnect.com/content/schweiz/rs/pre-prints>, and then be replaced by the final proofs after your corrections have been carried out. The DOI is final and allows immediate citation.

We offer this service to all authors of River Systems free of charge.

For details on Citation and Cross Referencing of Fast Track articles please visit the journals website.

Open Access: Authors may have their articles made freely available online against charges (Optional Open Access). Please contact the Publishers for details.

Authors are encouraged to place all species distribution records in a publicly accessible database such as the national Global Biodiversity Information Facility (GBIF) nodes (www.gbif.org) or data centers endorsed by GBIF, including BioFresh (www.freshwaterbiodiversity.eu).

Publishing House: E. Schweizerbart'sche Verlagsbuchhandlung (Nägele u. Obermiller), Johannesstraße 3A, 70176 Stuttgart, Germany, Phone +49(0)711-3514560, Fax +49(0)711-35146699, mail@schweizerbart.de
